

INSTRUCTION

Forza 150B

● How to update the firmware of Forza 150B:

1. Download the firmware installation package from the website.
2. The update file "Forza_150B_Fw_Vx.xx.xx.upd" and "Forza_150B_B_Fw_Vx.xx.xx.upd" must be stored in the root directory of the USB flash drive.
3. Insert the USB flash drive into the USB port on the fixture.
4. In the menu, rotate "Right knob" to "UPDATE".

5. Press "Right knob" to enter the firmware update interface.

6. Rotate "Right knob" to select "UPDATE".

7. Press "Right knob" to confirm the update and it will prompt "FIRMWARE UPDATED" after the firmware update is completed and the fixture will restart.

● Precautions:

1. Please do not rename the firmware file when download from the website.
2. Ensure the USB version is formatted to FAT, FAT32 or exFAT.
3. If it prompt "NO FIRMWARE FOUND", please check whether the firmware file is correct; whether the file is stored in the root directory of the drive, or whether the USB flash drive is formatted to FAT, FAT32 or exFAT.
4. If the firmware still cannot be found after following all the steps mentioned above , please try to reformat the USB flash drive and follow the update instructions above to update again.
5. If the USB flash drive still cannot be identified after following the two steps mentioned above, please replace the USB flash drive with another one.
