1. Vital Precautions

WARNING! High voltage! Risk of electric shock and fire.

- Read and understand all safety information and operation instructions before you operate or install the product or the system.
- Use solely and exclusively as described in the instructions.
- Always check that the local AC power matches the voltage and frequency range printed on the type label of the product before use.
- Always earth the fixture electrically.
- Use only a genuine Senna power supply and connection cable designed for the M4.
- Do not connect or disconnect the header cable when powered. The connectors can be damaged by arcing.
- Never use the cables for transportation. Never hang the product on its cables.
- Never attempt to repair any part of the product on your own.

WARNING! Humidity and Condensation! Risk of electric shock and fire.

- Never expose the product to rain or moisture.
- Do not use the product for 2 h when it was exposed to big temperature differences as condensed moisture may damage the product electrically when switched on.

WARNING! Overheating! Risk of fire.

- Do not operate the product in its full power if the environment temperature exceeds 30° C.
- When environment temperature exceeds 30° C, the Product must be used on 70% of its power.
- Intensive use can cause the surface to become hot. Let the product cool down complete before you handle it.
- Never cover air vents during operation. Keep a minimum clearance around the air vents of 0.5 m.
- Never point a light beam from another luminaire into the diffuser.
- Do not place the product on or nearby heat sources. Intense heat cause damage to the product or automatic power off during operation.
- Do not use the products with **lens and diffuser** at the same time!

WARNING! Intense Light! Risk of injury and fire.

- Do not stare at operating light source.
- Intense light. Do not stare at the light output aperture. Risk of irreversible eye injury. Wear safety glasses. Keep a minimum distance to an illuminated surface, objects or persons of 1m.

WARNING! Heavy weight! Risk of injury and damage.

- Keep your fingers away from joints and moving parts.
- Devices and accessories must be secured against fall when mounted above floor level.
- Always observe common and local safety regulations.
- Disconnect all cables prior to transport.

User Manual

2. Introduction

2.1. Specifications:

M4 - LED PANEL	
Parameter	Value
Series	Masterpiece
LED configuration	Full RGB + W + W
Dimensions	1040*300*170mm
Weight	15 kg
Light aperture	1004 x 260 mm
Voltage input	48 Vdc +/- 5%
Power consumption	800W maximum
Unit power connection :	WEIPU 20 series 4 pin
Dimming	0% to 100% continuous
Flicker	flicker free 10% to 100%
Color temperature	1.500K – 20.000K
Control	Full on board touch screen/wired DMX/LumenRadio CRMX wireless
Beam angle	60° (half peak angle), 15° with optical lens
Color rendering	CRI average > 97
IP rating	IP20
Operation temperature-	Max. power: -20°C to + 30°C; 70% power: >+30°C

M4 - POWER SUPPLY	
Parameter	Value
Series	PS800
Dimension	400 x 190 x 110 mm
Weight	approx. 3,5 kg
Input range	100 to 240Vac, 50/60HZ, 800VA max
Output range	48 Vdc, 64A, 800VA max
Power input connection	NEUTRIK power CON 16A / Schuko (EU), 2meter
Power output connection	WEIPU 20 series 4pin
Operation temperature	-20°C to + 35°C

2.2. Basic Components

1. Light fixture
2. Stand adapter
3. Power supply
4. Cabling
5. Carry bag

User Manual

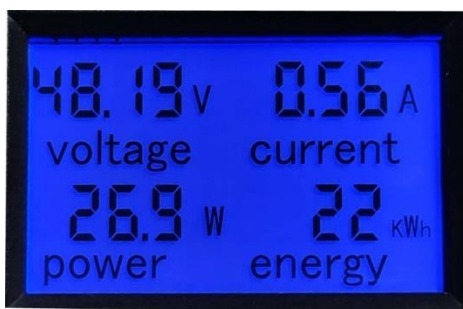

3. Manual control of M4

M4 dashboard

3.1. Getting started

1. Connect the M4 with power supply box with the enclosed cable.
2. Turn the power supply on.

Power supply display

M4 display

3. The display of power supply will show voltage, current, power and energy consumption (see the picture above)
4. The display 1 on the M4 control board will show introduction message. The QR code on the introduction message takes you to www.senna.hr where you can find more info about M4.
5. After 10 seconds Main Menu will show on the display.

User Manual

4. The Menu

There are 8 modes available in the Menu:

1. CCT
2. RGBW
3. HSI
4. GEL
5. XY
6. Effects
7. Settings
8. DMX

- To choose any of these modes simply touch the screen. The icon of the mode you have selected will turn green.
- In the right down angle there are 2 icons:

Touch to lock/turn off the screen. To turn the screen on again, touch the screen or turn any knob.

Touch to change the level of fan speed to FULL, HALF or OFF. Selected level will turn green.

4.1. CCT

User Manual

1. To choose CCT mode simply touch the CCT icon in the left menu in the screen. The icon will turn green.
2. There are CCT and CCT+ option for your selection. Touch the screen to choose one. The icon will turn green.
CCT mode provides temperature range from 3.000K to 6.000K
CCT+ mode provides temperature range from 1.500K to 20.000K
3. To make adjustments of dimmer, temperature and green/magenta point, you can slide your finger along the lines or use regulation knobs on the right side of the display:
 - Use regulation knob 1 to adjust dimmer (for fast dimmer adjustments, press knob 1– 1 time for 25%, two times for 50%, 3 times for 75%, 4 times for 100%)
 - Use regulation knob 2 to adjust temperature (for fast temperature adjustments, press knob 2 – 1 time for 3.200K, two times for 4.500K, 3 times for 5.600K)
 - Use regulation knob 3 to adjust green/magenta (for fast return to 0%, press knob 3)
4. To save the adjustments you have made as a memory pre-set simply touch one of 6 memory buttons at the bottom of the screen. The number of saved memory pre-set will turn green.

4.2. RGBW

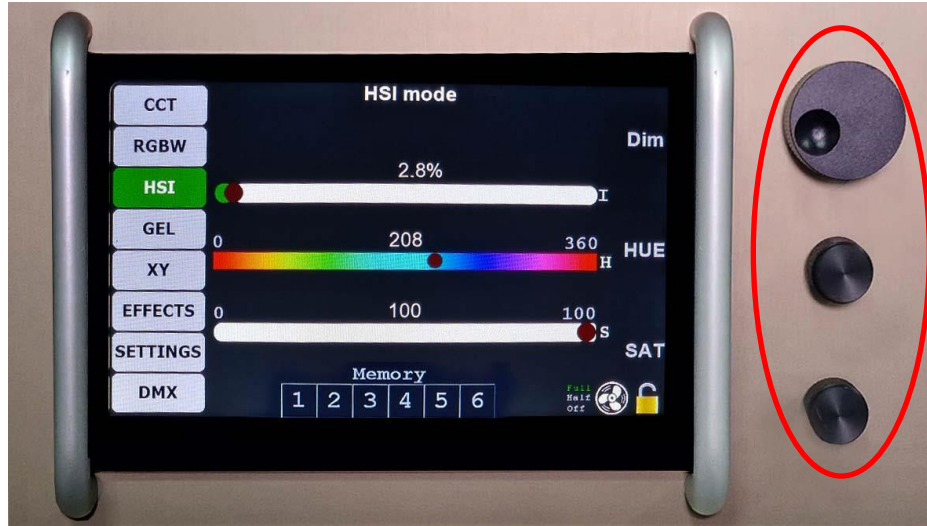

5. To choose RGBW mode simply touch the RGBW icon in the left menu in the screen. The icon will turn green.
6. To select a colour (Red, Green, Blue, White, Warm White) you want to adjust, simply touch the icon with a color, or use regulation knob 3 (select).
The icon of the colour you have selected will get white frame.
7. To adjust **dimmer of a selected color** – use regulation knob 2 (single color)
Dimmer percentage will show on the selected color icon.
(for fast dimmer adjustments, press knob 1– 1 time for 25%, two times for 50%, 3 times for 75%, 4 times for 100%)
8. To adjust **dimmer in general** – use regulation knob 1 (dimmer)
General dimmer percentage will show in the right upper corner of the display.
(for fast dimmer adjustments, press knob 1– 1 time for 25%, two times for 50%, 3 times for 75%, 4 times for 100%)
Please note! General dimmer is limited to 800 W power consumption. If you turn all colors to intensity of 100%, general dimmer will not be 100%, it will get lower in order to maintain power consumption of 800 W.

User Manual

- To save the adjustments you have made as a memory pre-set simply touch one of 6 memory buttons at the bottom of the screen. The number of saved memory pre-set will turn green.
- There are also 15 color presets which you can select by touching the icon.

4.3. HSI

- To choose HSI mode simply touch the HSI icon in the left menu in the screen. The icon will turn green.
- To make adjustments of dimmer, hue and saturation you can slide your finger along the lines or use regulation knobs on the right side of the display:
 - Use regulation knob 1 to adjust Dimmer
 - Use regulation knob 2 to adjust Hue
 - Use regulation knob 3 to adjust Saturation
- To save the adjustments you have made as a memory pre-set simply touch one of 6 memory buttons at the bottom of the screen. The number of saved memory pre-set will turn green.

4.4. Gel

User Manual

1. To choose Gel mode simply touch the Gel icon in the left menu in the screen. The icon will turn green.
2. There are 3 Gel groups available in this mode:
 1. Lee Color correction
 2. Lee Filters Color
 3. Rosco Color

To select one of these groups simply touch its icon. The icon will turn green.

3. Each of the 3 gel groups has different gels for your selection. Choose any of them by touching its icon or using the regulation knob 3 (Select)
4. Use regulation knob 1 to adjust Dimmer
5. Use regulation knob 2 to adjust color temperature Base (from 3.200K to 5.600K)
6. To save the adjustments you have made as a memory pre-set simply touch one of 6 memory buttons at the bottom of the screen. The number of saved memory pre-set will turn green.

4.5. XY - This mode will be available soon!

4.6. Effects

1. To choose **Effect mode** simply touch the Effect icon in the left menu in the screen. The icon will turn green.
2. There are **5 groups of effects** available in this mode:
 1. **Basic** - TV, Welding, Paparazzi, Kachusha, Fireworks, Explosion, Test
 2. **Natural** - Lightning, Fire single, Fire Multi, Candles, Clouds, Comet, Sunrise, Sunset, Aurora
 3. **Warning** - Police, Security, Warning, Fireman
 4. **Party** – Color Chase, Strobe, Disco ball
 5. **Travel** - Snake, Snake Reverse, Snake White

***Test effect** is used only to indicate LED panel addresses, and you should use it prior to firmware update. More about this subject is available in Firmware update instructions.

To select one of these effects simply touch its icon.
The icon will turn green, and the effect will perform.

User Manual

3. Use regulation knob 1 to adjust Dimmer
4. Use regulation knob 2 to adjust Color temperature
5. Use regulation knob 3 to adjust the Speed of effect

4.7. Settings

To choose Settings mode simply touch the Settings icon in the left menu in the screen. The icon will turn green. Display will show these settings:

- Timer
- Options
- Lumen radio
- Accessories

4.7.1. Timer

To enter timer settings simply touch its icon. Display will show 2 timers:

- **General time** – shows total time the fixture has been used. This timer cannot be reset!
- **User Time** – shows time the fixture has been used since last reset of the timer.

User Manual

To reset User Timer, please follow the steps:

1. Touch the User Timer.
2. You will be asked to enter 4 digits PIN provided by Manufacturer.
3. After you have entered correct pin, press OK
4. User Timer will be set to 00:00

To go back to Settings, simply touch the Settings icon on the left.

4.7.2. Options

To enter Options settings simply touch its icon. Display will show 3 settings:

- **Volume** - If you turn the volume up, the voice will pronounce every command you select in the menu.
- **Logo light** –with this command you can adjust the intensity of Masterpiece logo light at the back side of the Masterpiece body.
- **Display min.:** this command allows you to adjust the length of inactivity period after which the display will turn off.

To adjust the level of volume, logo light and display min., simply slide along the line with your finger. To go back to Settings, simply touch the Settings icon on the left.

4.7.3. Lumen Radio

Lumen Radio settings enable you to UNLINK Masterpiece from your lumen radio device. When lumen radio device is linked, *RG Link* indicator will turn green and *link quality* will show connection strength in percentage.

To unlink it, please follow the steps:

User Manual

1. Enter Lumen radio settings by touching its icon. The icon will turn green.
2. Display will show the UNLINK button.
3. Touch UNLINK button.
4. Lumen radio is unlinked.

4.7.4. Accessories

Before any use of the Masterpiece with accessories it is essential to adjust cooling and power of the fixture first. The system will make automatic adjustments with these steps:

1. Enter Accessories settings by touching its icon. The icon will turn green.
2. Display will show different Accessories icons.
3. Touch the icon to make your selection. The icon will turn green.
4. System will automatically adjust cooling and power in accordance to your selection.

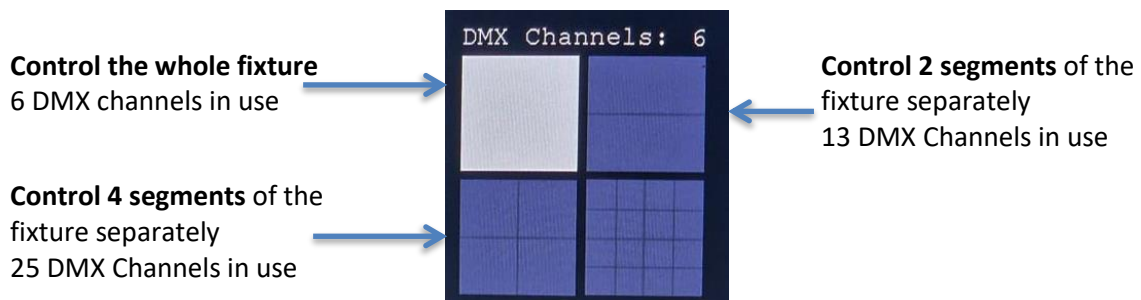

User Manual

4.8. DMX

To enter RGBW mode simply touch the RGBW icon in the left menu. The icon will turn green and display will show this information:

1. First thing you need to do is to set the range of operation, by choosing the segment(s) of M4 you want to control separately. You can do that by touching the parts in the picture (below). Selected segment will turn white:

2. Set DMX address by touching **+** - buttons
 - To set and lock DMX address, turn the knob 1 until you reach desirable number and then press knob 1 to lock your selection. Number will turn red and you will not be able to change it with +- buttons.

User Manual

- **To unlock the address**, press knob 1 once more.
3. Select Dimmer mode. There are 4 dimmer modes available for your selection.
 1. Linear
 2. Exponent (temporary not available)
 3. Logarithm (temporary not available)
 4. S curve (temporary not available)

You can select one of these by touching the icon or using the navigation knob 3. Selected icon will turn green.

4. Now you can select the mode of operation by touching **UP** or **DOWN** button or using the navigation knob 2. Selected icon will turn green.

There are 5 DMX modes available:

1. CCT 8 bit
2. RGBW 8 bit
3. HSI 8 bit
4. GEL
5. ULTIMATE 8 bit

4.8.5. DMX - Ultimate mode

Ultimate mode enables you to control all the modes at once with your DMX control plate.

To select the Ultimate mode touch **UP or DOWN** button or use the navigation knob 2 until you reach Ultimate mode icon. Selected icon will turn green. Once Ultimate mode is selected, the channels on your DMX control plate will control:

User Manual

5. Controlling M4 with SkyBeast console

Pairing your devices

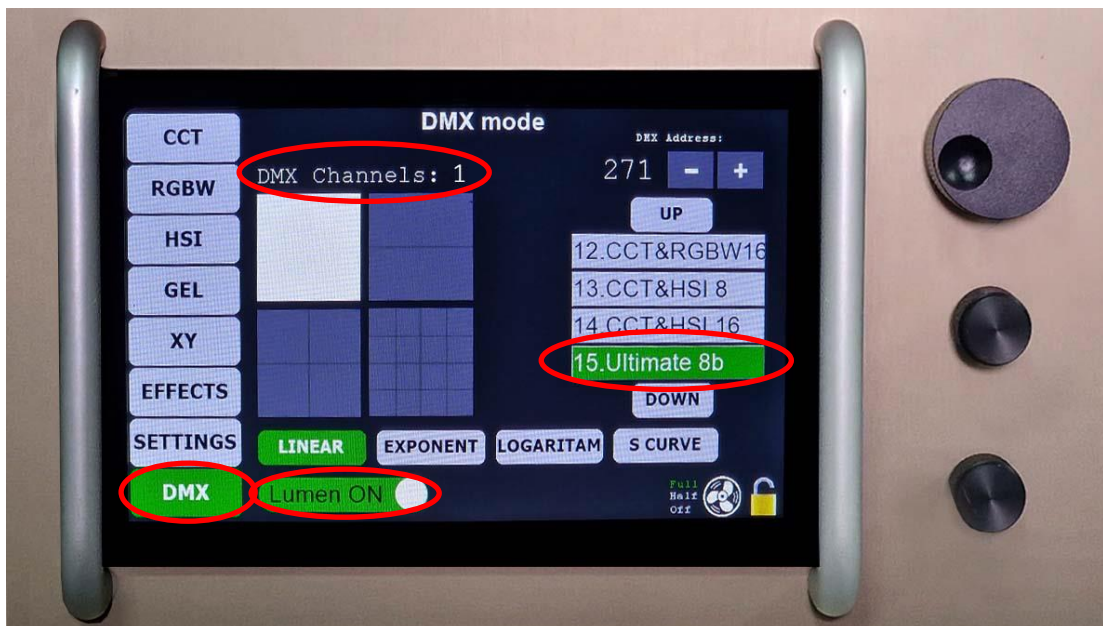

To be able to control your M4 with SkyBeast console, you should first pair these two devices.

- **Here are the settings you need to make on your M4:**

1. Select DMX mode on your M4
2. Select Ultimate mode (8 bit or 16 bit)
3. Set Lumen radio – ON
4. Select desirable DMX channel of your M4.

Pay attention that the number of DMX channel selected on your M4 must match the number of the selected bank on your SkyBeast console!

The picture below shows the necessary selections:

User Manual

- Here are the settings you need to make on your SkyBeast:

- Press and hold the *Menu* button for 5 seconds to enter the menu
- Use *General Master (-)* and *Mode Select (+)* buttons to navigate the menu until you reach command *Link Lumenradio*
- Press *Menu* button shortly to confirm selection
- Display will show *Linking LumenRadio...*
- When display returns to settings LumenRadio is linked.
- Press and hold *Menu* button for 5 sec to enter the *Menu* once again
- Use *General Master (-)* and *Mode Select (+)* buttons to navigate the menu until you reach command *Masterpiece by Senna*
- Press *Menu* button shortly to confirm selection
- Display will show *Masterpiece selected*
- When display shows DMX channels M4 is paired to the SkyBeast

Please make sure that the number of DMX channel selected on your M4 matches the number of the selected bank on your SkyBeast console! There are 16 bank available on your SkyBeast console (each containing 30 channels) + 4 standard mode channels.

Here are the steps you need to take to select a bank on your SkyBeast console:

User Manual

1. Press **shortly** buttons *General Master* and *Mode select* together.
2. The number of the bank on display will start blinking.
3. Use **navigation buttons** - *General Master (-)* and *Mode Select (+)* until the desirable DMX bank number is shown on the display.
4. To confirm your choice press buttons *General Master* and *Mode select* at the same time again shortly.

You should follow the same steps (above) when you are controlling more than one fixture with your SkyBeast control, and you want to navigate from one fixture to another!

5.3. Mode selection

To select a mode on your SkyBeast console please follow the steps:

1. Press and hold *Mode Select button*.
2. While holding *Mode Select button*, use 1. *Channel Potentiometer* to navigate through 6 available modes. Your navigation will be shown on the display.
3. If you choose Gel or Effects mode use 2. *Channel Potentiometer* to navigate through sub-modes Groups. (While still holding the *Mode Select button*) and then use 3. *Channel Potentiometer* to choose Gel/Effect. Your navigation will be shown on the display.
4. When you have reached desirable mode (and sub-mode), you can release the *Mode Select button*.
5. You can now make adjustments in the selected mode as shown in the scheme in the next chapter.

1. CCT	Channel potentiometer 1 – Volume Channel potentiometer 2 – Colour temperature (2800K-10000K) Channel potentiometer 3 – Green/magenta
2. HSI	Channel potentiometer 1 – Volume Channel potentiometer 3 – Hue Channel potentiometer 4 – Saturation
3. RGBW	Channel potentiometer 1 – Volume Channel potentiometer 2 – RED Channel potentiometer 3 – GREEN Channel potentiometer 4 – BLUE Channel potentiometer 5 – WHITE Channel potentiometer 6 – WARM
4. GEL SELECT	<ul style="list-style-type: none"> • LEE: Channel potentiometer 1 – Volume

User Manual

Filters cannot be combined. In order to affect one filter all other filters (channel potentiometers) must be set on 0 positions.	Channel potentiometer 2 – Colour temp. base (3200K or 5600K) Channel potentiometer 3 – Gel selection - Colour correction Channel potentiometer 4 – Colour filters <ul style="list-style-type: none">• ROSCO: Channel potentiometer 1 – Volume Channel potentiometer 2 – Colour temp. base (3200K or 5600K) Channel potentiometer 3 – Colour correction
5. XY COORDINATES	Will be available soon!
6. EFFECTS:	Channel potentiometer 1 – Volume Channel potentiometer 2 – Speed Channel potentiometer 3 – Fade Channel potentiometer 4 – Stop/Go

5.4. Memory pre-sets

When you have made adjustments of the modes you can store your own memory pre-sets. There are 6 memory pre-sets available for each bank. To store a pre-set please follow the steps:

1. Make all adjustments of operational modes you want as described in the previous chapter
2. Press and hold one of the memory buttons until all memory buttons turn red.
3. Memory pre-set is now saved.
4. To recall previously stored pre-set, press shortly the memory button on which you have stored the pre-set. Memory button will turn green. Channel potentiometers will automatically get into positions of recalled pre-set.
5. Fade speed between memory pre-sets can be adjusted using *Fade Speed knob* **except for Gel select mode and Effects.**

*If you change the bank and select another DMX fixture, stored pre-sets will not be deleted. You will be able to recall them when you return to the bank.

5.5. Auto Memory recall

After you have stored the desired light pre-sets, you can set the automatic memory recall of the session of pre-sets.

To set auto memory recall, please follow the steps:

User Manual

1. Press and hold *Menu* button and while holding it press memory button with which you would like to start the recall session. Red light on the memory button will turn on.
2. Now press memory button where the second wanted pre-set is stored. Second memory button will turn green.
3. Repeat the step 2 until you have set all wanted memory pre-sets in desired recall session. Recall session can contain up to 20 pre-sets (You can set the same pre-set in session more than once, **except for the memory pre-set you have set as the first in session**)
4. Now you can release the *Menu* button.
5. Auto memory recall session is now stored.

IMPORTANT: Start pressing the memory buttons right after you have pressed the *Menu* button. If you wait for too long you will enter the Menu.

To activate *Auto Memory Recall* please follow the steps:

1. Press the *Menu* button shortly.
2. First memory pre-set will light up and then each next added pre-set and they will stop at the last memory pre-set stored in session.
3. Speed of fading from one recalled light pre-set to another can be adjusted with the ***Fade speed knob***.

Speed of alteration of light pre-sets can be adjusted with the ***Strobe/Chasing speed knob***.

5.6. Memory Loop cycle

This option allows the system to constantly loop over the stored light pre-sets in the order you have set.

To set memory loop cycle option, you should follow the steps 1-5 in the chapter 4.4. *Auto Memory Recall* with one difference: **make sure to set the same light pre-set as the first and the last in the memory recall session!**

Set as described, the light will keep looping the light pre-set session as long as you do not press the *Menu* button shortly once again.

Speed of fading from one recalled light pre-set to another can be adjusted with the ***Fade speed knob***.
Speed of alteration of light pre-sets can be adjusted with the ***Strobe/Chasing speed knob***.

5.7. General Master Settings

General Master Settings affect all DMX fixtures you have connected to SkyBeast console at once. This option enables you to:

- Change volume of all DMX fixtures at the same time
- Turn Strobe on all DMX fixtures
- Turn Chasing lights option on

User Manual

- Recall memory positions (1-6) on all DMX fixtures at the same time

5.7.1. General dimmer control

In order to control dimmer on all DMX fixtures at the same time without entering each bank separately, please follow the steps:

1. Press and hold *General Master button* until the LED bulb on the button turns ON.
2. Release *General Master button*.
3. *Channel potentiometers 2-8* will go to 0 position and display will show percentage of general dimmer that has been previous set. (see the picture on the right)
4. Use **Channel potentiometer 1** to increase/decrease dimmer of all DMX fixtures that have dimmer control on DMX channel 1
5. To exit *General Master Settings*, press and hold *General Master Button* until the LED bulb on the button turns OFF.
6. Now that you have set General dimmer, percentage of general dimmer will be shown on display all the time with red line.

5.7.2. Chasing lights

In order to activate Chasing lights of all DMX fixtures, please follow the steps:

1. Make all desirable adjustments on all DMX fixtures.
2. Press and hold *General Master Button* until the LED bulb on the button turns ON.
7. Release *General Master Button*.
3. All fixtures will turn on.

User Manual

4. Press *Mode Select button* shortly.
5. **All panels will turn off.**
6. Press *Mode Select button* shortly once again.
7. Chasing lights is active.
 - To adjust the speed of Chasing lights, use the *Strobe/Chasing Speed knob*.
 - To set direction of Chasing lights (clockwise/counter-clockwise) use *Potentiometer 2*.
 - To activate loop of Chasing lights (on/off) use *Potentiometer 3*.
 - To set the number of fixtures included in chasing session use *Potentiometer 4*.
 - To activate random Chasing option (on/off) use *Potentiometer 5*.
1. To exit *General Master Settings*, press and hold *General Master Button* until the LED bulb on the button turns OFF.

5.7.3. General memory recall

To recall memory pre-sets on all connected DMX fixtures at the same time, please follow the steps:

1. Enter General Master by pressing and holding *General Master Button* until the LED bulb on the button turns ON.
2. Press shortly desirable memory button (1-6).
3. Each DMX panel will turn to the memory pre-set you have previously saved on that memory button. (For example, if you press memory button 1, all fixtures will load memory pre-set 1, and so on)
4. Fade speed between memory pre-sets can be adjusted using *Fade Speed knob*.
5. To exit General Master settings, press and hold *General Master button* until the LED bulb on the button turns OFF.

6. WARRANTY LETTER

1. The Supplier warrants that on delivery, and for a period of 24 months from the date of Delivery (warranty period), the Goods shall:
 - a) conform in all material respects with their description and any applicable Goods Specification;
 - b) be free from material defects in design, material and workmanship;
 - c) be of satisfactory quality

2. In the case of any above mentioned:
 - a) The Customer shall give notice in writing during the warranty period within a reasonable time of discovery that some or all of the Goods do not comply with the warranty set out above;
 - b) The Supplier shall be given a reasonable opportunity of examining such Goods; and
 - c) The Customer (if asked to do so by the Supplier) shall return such Goods to the Supplier's place of business at the Supplier's cost, the Supplier shall, at its option, repair or replace the defective Goods, or refund the price of the defective Goods.

3. The Supplier shall not be liable for the Goods' failure to comply with the warranty in clause 1 if:
 - a) The Customer makes any further use of such Goods after giving a notice in accordance with clause 2a;
 - b) The defect arises because the Customer failed to follow the Supplier's oral or written instructions as to the storage, installation, commissioning, use or maintenance of the Goods or good trade practice;
 - c) The defect arises as a result of the Supplier following any drawing, design or Goods Specification supplied by the Customer;
 - d) The Customer alters or repairs such Goods without the written consent of the Supplier;
 - e) The defect arises as a result of fair wear and tear, wilful damage, negligence, or abnormal working conditions;
 - f) The Goods differ from their description or the Goods Specification as a result of changes made to ensure they comply with applicable statutory or regulatory standards:

User Manual

- g) The Goods have been installed operated and maintained other than in accordance with good cinematographic practice and recommendations of the manufacturers
- 4. The terms of these Conditions shall apply to any repaired or replacement Goods supplied by the Supplier under clause 2c.
